Mission Statement

To secure a friendly working environment supported by team work, systems and tools controlled by quality assurance methodology that allows our team to deliver innovative solutions to serve professionally and effectively customers' needs.

Introduction

RationalTeam for Technology is a company specialized in the field of information technology. The company was founded on 2009, with an objective of serving the society of information technology and contributing to the advance of utilization of computer science in sake of a better life. In spite of the great challenges in the field of information technology where the competition is far beyond the local market where considerable giant companies are globally dominating the field; the company has gained the trust and respect of very important organizations in Sudan. This mission was accomplished with the outstanding performance of the team of working staff who are highly qualified and have the experience to deliver a quality service and products. Our staff is minimally Masters Degree holders in the field of computer science and with experience of more than 10 years of work in the field.

Products range:

Rational team for Technology has a variety of products and services, in the core lies the development of software solutions and this service include the design, development and implementation. The company is then committed to provide the right customer support through its after sales services which will be explained in more details later.

Consultation regarding information technology implementations and adoption of new innovations and current trends is also one of the important services that the company provides.

Instrumentation for whatever organization size is guaranteed, where RationalTeam has partners outside the boarders, in major cities, (Our partner offices are in Dubai, Jeddah, Canton (China), London and Switzerland). Through this service the company can provide Network equipments, Servers, desktop computers, laptops and the accessories. Rational team is a registered electronic devices supplier.

Vision

Commitment to professionally deliver high quality solutions along with reliable services and support.

This is to be achieved through Capitalizing on creativity and innovation, Building trustful partnership with our clients through credibility and transparency and establishing an ongoing relationship with clients emphasized by close and reliable support.

Quality

Software solutions:

Adoption of Agile software production methodology, which embrace iterative development and testing as the core of development principle. So testing at each level of the development is must and insures that the module is tested and accepted by client to assure quality and correctness. This technology also insures the involvement of clients throughout the development phases of the software and as part of the development team; this will guarantee a great amount of quality to the delivered solution.

RationalTeam after sales service is crafted to keep close support of clients through (phone, remote desktop connection via internet, and personal visit by company support staff). This is to assure the real beneficial of the software in hand.

Hardware equipments

Rational team supplies high quality equipments provide by well known manufactures such as (Dell, Hp, Fujitsu Siemens and Toshiba), beside the fact that all supplied equipments are sold with guarantee against malfunction due to manufacturing faults.

Production Environment

Rational team equips the development team with latest technology hardware for the goals seek of proper utilization and maximization of productivity and efficiency.

Development tools

Programming languages are used according to the solution being developed and dependant on its nature, for example these tools are regularly used.

- 1- C++ programming language.
- 2- Microsoft C# dot net.
- 3- Java standard edition.
- 4- Java enterprise edition.
- 5- Ruby.
- 6- Microsoft visual basic dot net.
- 7- Java scripts.

Tools used for development

- 1- Microsoft Visual studio dot net.
- 2- NetBeans (Java, Ruby and JavaScript).
- 3- Adobe Dream Weaver.
- 4- Eclipse (Galileo edition)

Development concepts

Rational team for technology is using Agile Software development concepts. This is known for efficiency and quick delivery of software. Another issue is that this concept makes it easier to response to changes of specification that might occur at the development phase. Adding that the iterative nature of Agile development will allow clients to utilize the finished parts of the software and use it while the rest is being worked on and this emphasizes a good opportunity for clients to test and interact with the solution before it is completely delivered and allows them to modify and enhance the components they need.

Experience

As mentioned before most of the staff of RationalTeam is academically certified as Holders of Master's degree of computer science and most of them still work in the academic field at several university. And according to their experience in information technology which is extended to more than ten years of practice and teaching. RationalTeam is glad to put the knowledge and experience of its team in service of the society of information technology concerned organizations - which is believed that it is a very need for every one now a days.

It worth mentioning that RationalTeam staff has attended so many courses and trainings in different countries through their path of prior experience, also they had the chance to visit most of the relevant periodical exhibitions that takes place in the region.

It is one of the very important issues for RationalTeam to invest in the people and encourage their further qualification through higher education, training courses and participations in relevant activities in the region.
